Fast, Effective Impact Cleaning
Alfa Laval TJ MultiJet 50 Rotary Jet Head (4 nozzles)

**Application**
The Toftejorg MultiJet 50 rotary jet head provides 3D indexed impact cleaning over a defined time period. It is automatic and represents a guaranteed means of achieving quality assurance in tank cleaning. The device is suitable for processing, storage and transportation tanks and vessels between 250 and 1,250 m³.

**Working principle**
The flow of the cleaning fluid makes the nozzles perform a geared rotation around the vertical and horizontal axes. In the first cycle, the nozzles lay out a coarse pattern on the tank surface. The subsequent cycles gradually make the pattern more dense, until a full pattern is reached after 8 cycles.

**TECHNICAL DATA**
- **Lubricant:** Self-lubricating with the cleaning fluid
- **Max throw length:** 9 - 26 m
- **Impact throw length:** 5 - 14 m
- **Pressure**
  - **Working pressure:** 3 - 12 bar
  - **Recommended pressure:** 5 - 6.5 bar

**Cleaning Pattern**
- **First cycle**
- **Full pattern**

The above drawings show the cleaning pattern achieved on a cylindrical horizontal vessel. The difference between the first cycle and the full pattern represents the number of additional cycles available to increase the density of the cleaning.

**PHYSICAL DATA**
- **Materials:** 1.4404 (316L), PTFE, PVDF, PEEK, Carbon, ETFE, TFM.
- **Surface finish:** Matte
- **Temperature**
  - **Max. working temperature:** 95°C
  - **Max. ambient temperature:** 140°C
- **Weight:** 12.2 kg
- **Connections**
  - Standard female thread: 2" Rp (BSP) NPT, female
- **Caution**
  - Do not use for gas evacuation or air dispersion.

2.1
Standard Design
The choice of nozzle diameters can optimise jet impact length and flow rate at the desired pressure. The Toftejorg MultiJet 25 is also available with PEEK impeller. A welding adaptor with sealing for 1” ISO, 1” ANSI, 1 1/2” ISO Dairy Pipe or 1 1/2” SWG Pipe is available as an accessory.

Ordering
Please specify nozzle size, inlet/guide configuration and connections and confirm application suitability. Sizing/selection and installation drawings are available in Alfa Laval’s Selection Tools for Tank Cleaning.

Options
- Electronic rotation sensor to verify 3D coverage
- TRAX simulation tool

TRAX is a unique software that simulates how the Toftejorg MJ50 performs in a specific tank or vessel.

The simulation PIPX0917EN 0910 Alfa Laval reserves the right to change specifications without prior notification. How to contact Alfa Laval: Up-to-date Alfa Laval contact details for all countries are always available on our website at www.alfalaval.com. This information is used to determine the best location of the tank cleaning machine and the correct combination of flow, time and pressure to implement.
A TRAX demo containing different cleaning simulations covering a variety of applications can be used as reference and documentation for tank cleaning applications. A TRAX simulation is free and available upon request.

Wetting Intensity

D8m H10m, Toftejorg MJ50, 4 x ø10mm, 0 % Time = 6.5 min., Water consumption = 2565 l

D8m H10m, Toftejorg MJ50, 4 x ø10 mm, 0 % Time = 23.3 min., Water consumption = 10868 l
